

Junior Software Engineer

Sentenial Ireland is offering you an opportunity to hold a significant role in a highly successful Irish software business success story. Established in 2004, Sentenial is the leading provider of Direct Debit processing services and solutions for numerous domestic Direct Debit schemes, and is a forerunner for SEPA (Single European Payments Area). With clients ranging from SMEs to large global banks using our Direct Debit facilities, we've built a reputation for best in class solutions, accurate and efficient delivery, and excellent customer service.

Sentenial is an ambitious, dynamic and fast-growing company and are currently seeking to recruit hard working, self motivated Senior Software Engineer to work with in our technical teams. You will need to be a team player with good communication skills, problem solving skills and an ability to learn quickly about new technologies. In turn Sentenial offers candidates the opportunity to work as part of a dynamic team and take part in the design, implementation and maintenance of existing and future applications and to be part of a cutting edge team with world class customers.

Sentenial is based off the west bound N4 in the Maynooth Business Campus. It is highly accessible by car, commuter rail and train. Sentenial offers all employees car parking and employee's can also benefit from the TaxSaver commuter ticket scheme.

The role involves:

- Developing, customizing and configuring software for the Sentenial customer base. This will include the following:
- Identifying project requirements.
- Documenting and communicating such requirements.
- Software specification and software design.
- Software development, software customisation and software configuration.
- Software unit testing and software system testing of all deliverables.
- Software delivery and software installation.
- Working closely with the engineering team in all stages of the SDLC.
- Working closely with Customer Service Representatives and System Administrators to ensure high availability of production systems.
- Research and development on new technologies and product development.
- Working closely with internal teams to solve business challenges.
- Providing support to the development teams as and when required.

Candidate Requirements:

- Candidates should have a 2.1 or higher in a Computer Science or an IT related discipline.
- Candidates must have at least 1-2 years experience in Java/ J2EE in a development role.
- Excellent verbal communication, written communication, interpersonal and presentation skills.

- An ability to prioritise own workload and work to strict deadlines.
- Flexibility and adaptability in the approach to customer and business needs.
- Excellent customer facing skills.
- Preferred Technical Experience & Skills:
 - Java 1.5, XML
 - Struts, MVC, JSP
 - EJB, Hibernate, Spring, Web Services,
 - UML
 - JUnit, ANT, Maven
 - Eclipse IDE
 - JBoss, Tomcat, Websphere
 - UNIX/LINUX
 - Oracle, PI/SQL knowledge a distinct advantage.

Desirable:

- Experience/ knowledge of Financial / Payment Applications is an advantage, as is knowledge of the financial services industry.
